

## Theme park

I USED to be ambivalent about the proposed cable car — until I looked up the official website and saw the concept plan. I urge readers to check it out. The cable car is one thing, but the base camp at the Cascade site will change the simplicity of that area forever, transforming it into something resembling a theme park.

The rapidly snowballing sellout of Tasmania to tourism is becoming alarming. Are we to become one big theme park with all available housing converted to Airbnb tourist accommodation or will we retain the simplicity that people came to savour?
